## PROCEDURE AND COST OF TELEMEDICINE

### **Step One: 1st Assessment Tissue Mineral Analysis (TMA)**

- Follow the steps outlined in the document “STEPS TO FOLLOW FOR FUR ANALYSIS TELEMED”
- Check that the shipment includes all of the documents, samples, reports, photo. Some of these can be provided via email: [DrAvaFrick@AvaFrick.net](mailto:DrAvaFrick@AvaFrick.net)
- Send to Dr. Frick at IVE, Inc. 1825 Denmark Road, Union, MO 63084
- Include a check or follow directions for secured credit card processing site

### **Step Two: Samples Received**

- The fur will be sent to Analytical Research Laboratory for processing. This can take up to 4 weeks
- Other documents will be kept for the review and analysis done by Dr. Frick once the report is received

### **Step Three: Dr. Frick’s Analysis and Report**

- The TMA results and CAN Survey are assessed and a report of findings is compiled
- The cheek swab and some of the saved fur is used as DNA sampling to run other tests. This directs us to the etiology (the cause of a disease) of current and past apparent conditions. And better selection of products for correcting the priorities. Standard testing includes:
  - Toxins and contaminating elements such as virus, bacteria, heavy metals, chemicals, parasites, and other interferences
  - Body organ and gland bio-frequency scan
- Additional tests that could be considered if the history given and, for dogs and cats, the CAN survey warrants them. You will be contacted to see if you are interested in also running these. There is an additional charge for them.
  - Food Sensitivities (\$55)
  - Environmental Allergens (\$55)

### **Step Four: 30-minute Phone Consultation**

- Reports will be sent to you via email and time options for the consultation.
- Once an agreed time and day have been reached, she will contact you. Dr. Frick will review the reports (that you have been sent via email), her assessment, and recommendations for diet and nutritional balancing. The goal is to get the least number of items to support the majority of the primary targets.

**PACKAGE COST: \$489** *This price does not include any products or the Food Sensitivity Test or Environmental Allergens Test. To get started download all the documents and purchase this service in the shopping tab using the secured credit card processing.*
